TEST AND DRAIN VALVE

WTV-059►

Test& drain Valve

This Test & Drain Valve Used to test waterflow through sprinkler systems. When not in the closed position, the valve can be either fully open (full port),

The valve features two large and integral sight glasses allowing for maximum visibility when operated. The compact and integrated form allow for installation in both horizontal and vertical orientations in a small amount of space.

Positive positioning of handle for off, test or drain

two threaded connections.

large, integral sight glass on both sides
