

The Fireguard Jockey Pump is an industry leading, Australian designed panel with UL Certification. All our Jockey Pumps are centred on the use of purpose built industrial grade components, in a highly serviceable and versatile package.

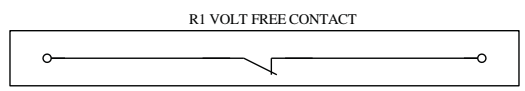

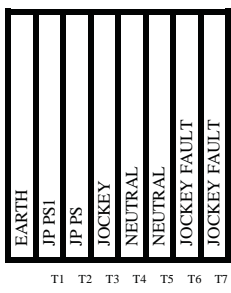

Our Jockey Pumps are available in 240v single phase and 415v 3 phase. All panels produced by Power Industries Australia comply with AS 2941-2013. They are built to last and withstand industrial conditions with 2mm galvanised IP54 rated enclosure and powder coated with UV rated labels. Being UL Certified they have been rigorously tested for their design, purpose and durability.

Our Jockey Pumps are simple, reliable and operate under all conditions.
